RED LIPSTICK

WEAR IT IF: ✓

- You prefer to keep your eye make-up minimal. A dusting of pale glimmer shadow and one coat of mascara are all you need to balance your statement red lips.
- You keep your lips well conditioned. Lip exfoliants and balms will ensure your pout is smooth and flake-free – the must-have base for red.
- You choose a suit-all, full-bodied shade that will imbue your summer face with extra warmth. We love Pure & Natural lipstick in Sunrise Red, \$18.95, by Camouflage Colour, 03 9551 5544.

DON'T WEAR IT IF: ✗

- You have skin that tends to flush in summer heat. Yes, you could pack on concealer, but who wants all that extra make-up weight when it's warm?
- You're heavy-handed. The best way to create red lips in summer is with a stain. Simply swipe it on with your little finger and soften around the edges.
- You're worried about thin or uneven lips. In this instance, a neutral- or nude-toned gloss will give the most flattering, lip-plumping effect.
